

Kanate Boonsiri

Tel: 098-308-5030 Email: kanatemask@gmail.com

OBJECTIVE

I'm an applied computer science and a fast learner with strong passion to learn new tools and frameworks. Experience working on curriculum projects, websites and applications. Proficiency in C/C++, Python, SQL. I'm looking for an opportunity to leverage my skills and experience to drive success and innovation. Committed to continuous creative participation and enthusiasm for continuous learning.

EDUCATION

2020 - 2024 KMUTT. Applied Computer Science 3.7 GPAX

ACADEMIC PROJECT

2021 Java 2D multiplayer game Full-stack Developer

- Develop game using Java swing and Java awt.
- Learnt client-server communication.
- Learnt mechanics of multiplayer games.

2022 Marketplace website Web Development

- Create website using PHP, HTML, CSS, JS, EJS, NodeJS.
- Designed ER diagram for database.
- Designed user interface by using Figma.
- Learnt SQL and MongoDB database.

2023 Sound management application | Software Engineering Backend Developer

- Noise suppression and soundpad for microphone using python.
- Learnt agile software development, software life cycle and requirement analysis.

2024 Marketplace website Full-stack Developer

- Web application for selling second-hand products using MERN stack.
- Database design for item, transaction, user to user product selling.
- Create an API and use with Axios.

WORKING EXPERIENCE

Jun – Sep 2023 Data Science Internship (Krungsri, Bank of Ayudhya) 4 month period

- Work through the entire data science process with ongoing projects at Krungsri.
- Data Exploration, Data Cleansing and Feature Preparation, Feature Engineering, Feature Selection, Modeling, Evaluation, Hyperparameter optimization.
- Analyze the results of different models on available data including SVM, RF, GBM.
- Applying statistical methods to non-normally distributed data.
- Python, AWS – SageMaker and S3

Oct 2024 – Now Operation Engineer (RIS Central Group)

- Sync orders from different stores (Shopee, Lazada, Supersports, others) to a data warehouse using Kafka and RabbitMQ.
- Microsoft Azure, NodeJS, Postman, DBeaver

LANGUAGE

- Thai (Native)
- English (Vantage)

TECHNICAL SKILLS

- Programming language : HTML, CSS, Java, JavaScript, C, C++, Python, NodeJS
- Tools and software : React, Redux, Axios, Bootstrap5, ExpressJS, GIT, Postman
- Database : MongoDB, mySQL
