

Kanate Boonsiri

Tel: 098-308-5030 Email: kanatemask@gmail.com

SUMMARY

Full-stack engineer with experience building scalable backend services and data-driven systems in e-commerce and data platforms. Skilled in designing microservices, handling asynchronous workflows, and deploying production systems using modern cloud and container technologies. Strong foundation in software engineering with hands-on experience in real-world applications.

EDUCATION

King Mongkut's University of Technology Thonburi (KMUTT) B.Sc. Applied Computer Science | 2020 – 2024 GPAX: 3.70

WORK EXPERIENCE

Full Stack Engineer RIS Central Group | Oct 2024 – Present

Project: PMP (Product Management Platform)

- Developed microservices for order processing and fulfillment across e-commerce platforms (Shopee, Lazada, Mirakl, Shopify).
- Designed Order Split & Release Service for warehouse allocation.
- Built asynchronous workflows using Kafka and RabbitMQ to handle high-volume order processing.
- Implemented business logic for Gift with Purchase bundling, backorders, and fulfillment constraints.
- Developed Stock Reservation Service to support flash sale events and virtual stock allocation.
- NestJS (TypeScript), Sequelize, Microsoft SQL Server, Kafka, RabbitMQ, Azure, Docker, Kubernetes.

Project: LUKE (Data Warehouse & Reconciliation System)

- Built data ingestion microservices to aggregate and reconcile orders from multiple platforms.
- Designed ETL workflows to store and normalize data into PostgreSQL (Snowflake).
- Developed automated reconciliation reports (daily, weekly, monthly) for business stakeholders.
- Processed external data sources (e.g., email ingestion) for reconciliation workflows.
- NestJS (TypeScript), TypeORM, PostgreSQL, Snowflake, Docker, Kubernetes.

Project: Pricehawk (Price Comparison Platform)

- Developed web scraping pipelines to collect competitor pricing data.
- Implemented product matching system with similarity scoring and manual verification UI.
- Automated daily price tracking and reporting system for competitive pricing analysis.
- FastAPI, Next.js, PostgreSQL (Neon DB), Railway, Docker, Vercel.

Data Science Intern Krungsri (Bank of Ayudhya) | Jun – Sep 2023

Project: Valuation System

- Work through the entire data science process with ongoing projects at Krungsri.
- Data Exploration, Data Cleansing and Feature Preparation, Feature Engineering, Feature Selection, Modeling, Evaluation, Hyperparameter optimization.
- Built and evaluated machine learning models (SVM, Random Forest, GBM).
- Applied statistical techniques to non-normally distributed datasets.
- Python, AWS (SageMaker, S3).

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, C/C++, SQL
- Backend: NestJS (Node.js), FastAPI
- Frontend: React, Next.js
- Messaging: Kafka, RabbitMQ
- Databases: PostgreSQL, MySQL, MongoDB, Snowflake
- ORM: TypeORM, Sequelize
- Cloud & DevOps: Azure, Docker, Kubernetes, Vercel, Railway
- Tools: Git, Lens, Postman, Apidog, DBeaver
